

Graco Announces Gusmer H-20/35 Sprayer and Reactor 2 Mobile App

January 31, 2018

Customer-inspired sprayer combines quality and performance, while Reactor 2 mobile app improves productivity and efficiency

MINNEAPOLIS--(BUSINESS WIRE)--Jan. 31, 2018-- Graco Inc. (**NYSE:GGG**), a leading manufacturer of fluid handling equipment, today formally introduced the Gusmer® H-20/35 sprayer and Reactor® 2 mobile app at the Spray Polyurethane Foam Alliance (SPFA) Convention & Expo in Mobile, Alabama. The Gusmer H-20/35 sprayer combines Graco's highest-performing pump line with a simple – yet robust – platform consisting of point-to-point wiring for basic controls and easy troubleshooting. The Reactor 2 mobile app gives spray foam contractors the ability to view and control the settings on their machines – in real time – using their smartphones.

"The Gusmer H-20/35 sprayer is built with simplicity and reliability, and the name symbolically recalls Graco's initial move into the industry with the purchase of Gusmer more than a decade ago," said Nick Pagano, Business Development Manager, Graco Applied Fluid Technologies Division. "This sprayer goes back to a tried and true platform, and meets an industry need for a machine with a basic feature set that's economical and easy to use while delivering excellent results."

The Gusmer H-20/35 sprayer is designed to help contractors be successful and make their jobs less stressful with simple controls, straightforward diagnosis and easy service.

"The customer-inspired Reactor 2 mobile app is specifically designed for use with the Graco Reactor 2 sprayer, and allows operators to adjust pressures and temperatures, receive error notifications, calculate yield, turn heat zones on and off, and view material drum levels," added Pagano. "The Reactor 2 mobile app will save contractors time and trips to their rig when they're in an attic, crawlspace or other inconvenient location by providing control of their machine on their smartphone wherever they are."

The Reactor 2 mobile app improves productivity and efficiency, and allows contractors to achieve better yields by conveniently providing real-time information and eliminating interruptions. The app is free to download on the App Store and Google Play.

ABOUT GRACO

Graco Inc. supplies technology and expertise for the management of fluids and coatings in both industrial and commercial applications. It designs, manufactures and markets systems and equipment to move, measure, control, dispense and spray fluid and powder materials. A recognized leader in its specialties, Minneapolis-based Graco serves customers around the world in the manufacturing, processing, construction and maintenance industries.
