

Graco Introduces Reactor 2 – Hydraulic Series Sprayers

June 11, 2015

With its customer-inspired features, Reactor 2 series of sprayers is the next generation of plural-component technology for spray foam and polyurea.

MINNEAPOLIS--(BUSINESS WIRE)--Jun. 11, 2015-- Graco Inc. (NYSE:GGG), a leading manufacturer of fluid handling equipment, today formally introduced the Reactor® 2 Hydraulic Series of plural-component sprayers. The Reactor 2 series of sprayers provides software and hardware advancements that help contractors apply materials more accurately. Reactor 2 offers innovative data reporting technologies that help owners track and record jobsite activity and spraying parameters.

"The Reactor 2 hydraulic line of sprayers combines the rugged, dependability of the hydraulic line with all of the industry leading features and benefits of the Reactor 2 spray platform," said Tryg Waterhouse, product marketing manager, Graco Applied Fluid Technologies Division. "Just like the Reactor 2 Electric Series of sprayers which was launched last year, the hydraulic series of Reactor 2 sprayers gives our customers a true 'best of the best' solution for spray foam and polyurea applications."

Customer-inspired changes include: the relocation of electronics for easier service; and an advanced hydraulic control module with a sacrificial surge protector for added protection. The control modules are backed by a three-year extended warranty. The Advanced Display Module (ADM) features data download, chemical recipe storage, drum level indicators and on-screen troubleshooting.

The Reactor 2 Elite model sprayers comes with an inlet pressure and temperature sensor (that interfaces with the ADM and Graco InSite™ remote reporting system), Xtreme-Wrap™ Scuff Guard on heated hoses for Reactor 2 sprayer packages, and Graco InSite™ remote monitoring service free for six months. Graco InSite remote reporting technology enables owners of spray foam businesses to see real-time jobsite data via smart phone, tablet or computer.
