

Graco Introduces New ProBell™ Rotary Applicator

October 5, 2016

High Performance Spraying with a Scalable Design

MINNEAPOLIS--(BUSINESS WIRE)--Oct. 5, 2016-- Graco Inc. (**NYSE:GGG**), a leading manufacturer of fluid handling equipment, is pleased to announce its new ProBell Rotary Applicator. This new rotary bell atomizer system offers high performance spraying with intuitive controls and a modular, scalable design. With the ProBell Applicator, users have the flexibility to start small with one controller and work their way up to more, or install a complete system all at once.

"The ProBell Applicator is a unique offering in the market because the modularity allows users to meet their production needs and budget," said Wendy Hartley, Graco's Industrial Products Division Senior Product Marketing Manager. "Designed for both performance and compatibility, it really is the best of both worlds."

The ProBell Applicator is offered in configurations for a fixed mount, reciprocator, solid wrist robot and hollow wrist robot. The hollow wrist robot configuration allows users to remove the applicator from the robot without touching hose connections, making it more convenient for maintenance.

In addition to delivering mounting compatibility, the ProBell Applicator is lightweight and compact, allowing for lower payload robots or reciprocators. The applicator's unique, scalable design paired with superior quality, high transfer efficiency and precision spraying makes it easy to develop solutions to fit each customer's installation needs.

For more information about the ProBell Rotary Applicator or to contact a Graco account manager or distributor, visit www.graco.com.
