

Graco Introduces Pulse Level Tank Monitoring System

September 13, 2021

Intuitive tank-level visibility to optimize deliveries, margins and customer service

MINNEAPOLIS--(BUSINESS WIRE)--Sep. 13, 2021-- Graco Inc. (NYSE:GGG), a leading manufacturer of fluid handling equipment, is excited to announce the launch of the Pulse[®] Level Tank Monitoring system. Choose from multiple tank-level monitoring technologies, including the first system running entirely on Wi-Fi. The Pulse Level system allows you to track tank levels, capture and apply data, and allocate inventory quickly, accurately and confidently from the industry's leading fluid management expert.

"Tank monitoring is not a new technology, but Graco now offers the most cost-effective long-term solution on the market," said Tyler Salminen, Product Marketing Manager for Graco's Lubrication Equipment Division. "With the addition of the Pulse Level system, Graco uniquely offers marketers and end users an end-to-end fluid management solution with components working seamlessly with each other."

A tank-level monitoring (TLM) system measures the amount of fluid in a tank, giving service centers, fleet garages, mining and construction operations, and industrial manufacturing companies more visibility over inventory levels and dispensed fluids. Managers and owners can use the data to simplify procurement, improve profitability and assess the overall performance of crews and technicians. Petroleum marketers can use TLM software to gain insight into their entire operation, and whether they oversee 20 tanks or 2,000+ tanks, tank fluid levels are tracked and monitored at every location.

Compatible with LTE networks, available in Wi-Fi configurations and incredibly easy to use, the Pulse Level system is the latest in Graco's storied lineup of fluid management solutions. Designed with the same commitment to quality as our pumps, meters, hose reels and other solutions, the Pulse Level system helps petroleum marketers, service centers, construction crews and in-plant users manage fluids strategically – and reduce costs significantly – with increased visibility of their tank fluid levels.

Graco will be showcasing the Pulse family of fluid management solutions, as well as the latest in lubrication equipment technology, at MINExpo INTERNATIONAL[®], which takes place Sept. 13-15, 2021, in Las Vegas, Nevada. Demonstrations can be scheduled for the show by visiting <http://www.graco.com/minexpo>, and Graco experts are available at booth #2473-North Hall to lend their expertise and answer your questions.
