QUANTM electric double diaphragm (EODD) pumps are purpose-built to match the needs of today's factories.

creates more opportunities for cost-saving drop-in replacements for current pumps.

QUANTM electric double diaphragm (EODD) pumps are purpose-built to match the needs of today's factories. Backed by Graco's nearly 100-year history in fluid handling, QUANTM leads the industry with technology designed for real, measurable progress—not just greenwashing or hype.

"Engineers, plant operators and C-level leaders in the markets we serve want hard evidence before they make a change on their lines," said Paul Trembl, Vice President of Marketing for Graco. "Adoption of QUANTM has grown rapidly because our customers are seeing measurable improvements in four key areas—reliability, productivity, energy costs and plant noise. Innovation drives progress and QUANTM pumps equip companies with breakthrough technology to exceed expectations with every customer and stakeholder."

### Top Benefits of QUANTM

- **Energy and Cost Savings:** Up to 80% more energy efficient than traditional pumps, reducing operating costs and delivering fast ROI, often within 12 months.
- **Simplified Maintenance:** The design makes routine maintenance easier, eliminates pressure sensors and reduces the risk of failure due to clogged lines or closed valves. It also handles challenging fluids, including abrasives, solids, aggressive chemicals and shear-sensitive materials.
- **Improved Safety:** Creates a safer and more comfortable working environment with noise levels reduced by up to 90%.
- **Built for Automation:** Designed for seamless integration into automated systems, making it ideal for modern industrial plant.

QUANTM is a convenient drop-in replacement because of its plug-and-play design and compatibility with existing 110V, 240V or 380V/480V power outlets.

"It's an incredibly versatile pump," said Matthew Bergman, Global Product Manager, for Graco. "It's a perfect fit for a wide range of industrial and hygienic applications. Thanks to the energy savings, the pump can pay for itself in less than 12 months—and it qualifies for governmental funding and rebates. We're seeing strong adoption across all vertical and geographic markets, and we expect that to increase in the coming years."

### About Graco

Graco Inc. supplies technology and expertise for the management of fluids and coatings in both industrial and commercial applications. It designs, manufactures and markets systems and equipment to move, measure, control, dispense and spray fluid and powder materials. A recognized leader in its specialties, Minneapolis-based Graco serves customers around the world in the manufacturing, processing, construction and maintenance industries.
